I pledge my honor that I have abided by the Stevens Honor System.

https://github.com/ihughes22/Team1-Agile (in our github, we work on different branches for features, so not all commits are currently in main)

1. **Executing Sprint 3: Finished Stories**

All of our stories were completed for this sprint!! We did really good work this sprint, and finished all of the functionality of our website. All that is left is to refactor our code, add CSS styling, and small database implementations.

2. **Executing Sprint 3: Burndown Chart**

We finished this sprint very early on, which is new for our team, but we did start a bit late again. We also added 5 points into our scope for one story, so we completed a few more points than we originally committed to.

Sprint		Commitment	Completed
Sprint 1		0	53
Sprint 2		62	46
Sprint 3		53	58
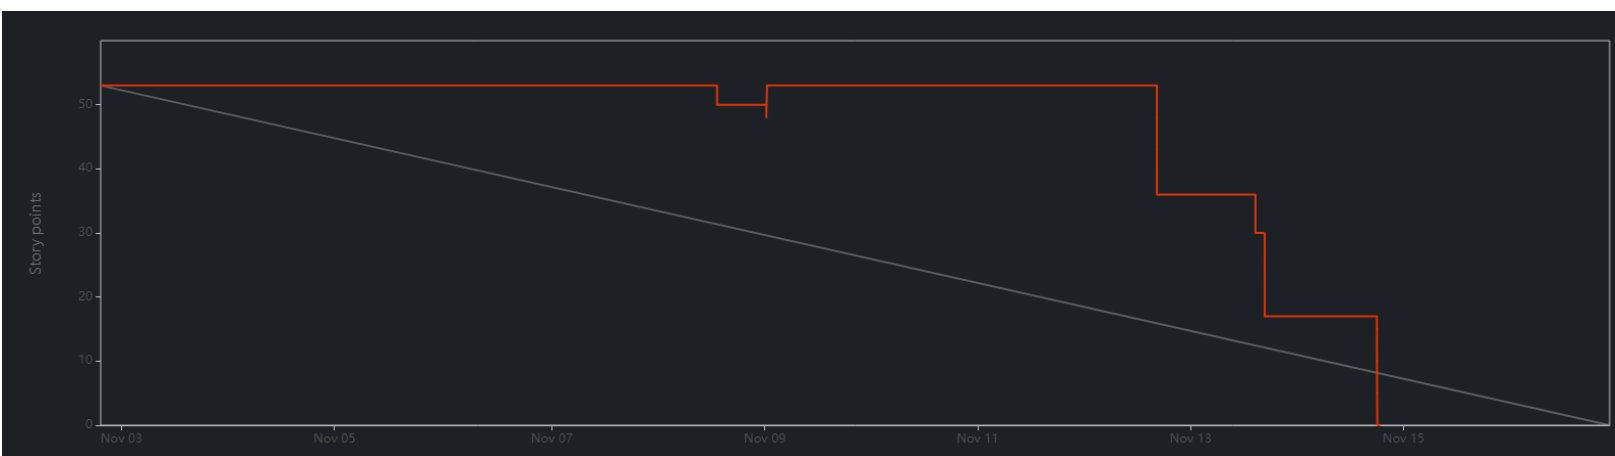

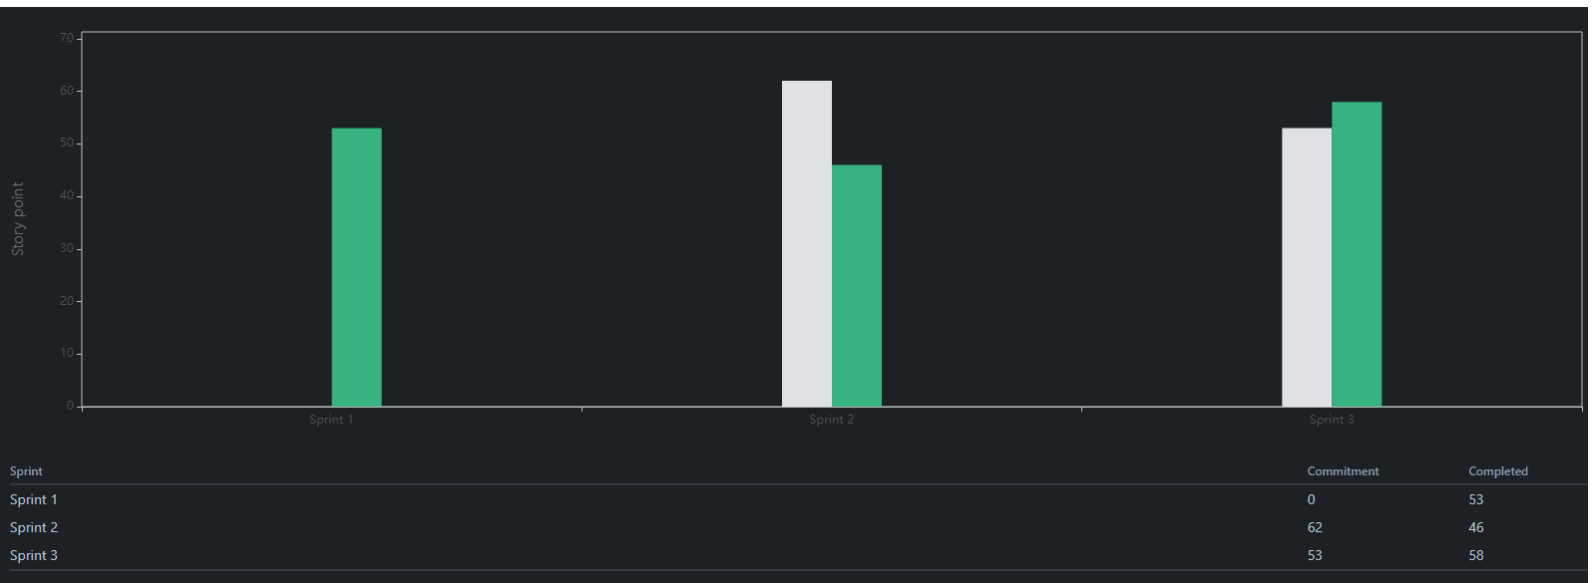

3. **Demonstrating Sprint #3 - Client Feedback**

Thursday, November 9th ˅

FS Digital 10:37 AM
Hi Team 1,

Great testing of the system. Excited to see the system come together with the remaining core features.

-Team FS

Tuesday, November 14th ˅

Isabel Hughes 11:26 AM

Hi @FS Digital! We have made some AMAZING!! progress this sprint. We are fully configured with the backend for pulling posts and user authentication. Would you have any time tomorrow for a quick demo meeting? If not, we can provide a demo video! For Sprint #4, all we have left is adding styles into our website, and also the implementation of family timelines. Currently, all our users are in the same timeline, but we are working to remediate that!

You should also be able to test our website yourself if you pull from our GitHub and npm start! https://github.com/ihughes22/Team1-Agile

Yesterday ⌄

FS Digital 12:24 PM

Hi Team 1,

We were able to run it, but would like a demo video. Loved what we saw thus far... excited to be walked through it.

-TeamFS

❤️ 1

Isabel Hughes 2:25 PM

Here is a demo video of the website! We will have the results file for our test cases to you tomorrow!

capture video with xbox game bar - Google Search - Google Chrome 2023-11-15 14-13-56.mp4 ⌄

4. <u>**Reviewing Sprint #3 - Team Retrospective:**</u>

✅ Action items

☐ @Isabel Hughes Stopping spending so much time on one story

☐ @Ashna Razdan organize code better into folders so it is easier to find files

☐ @Zuting Chen

☐ @Jolene Ciccarone better understand backend and how to use it efficiently

☐ @Ethan Kleschinsky Ask for help if needed, focus on wrapping up backend

☐ @Rodney Wotton Communicate with teammates about integrating my components with theirs

☐ @achaaba1 Be more efficient on time and finishing tasks a little faster.

💬 Retrospective

Start doing	Stop doing	Keep doing
try to format/ organize stories so there are fewer team dependency waits	Having repetitive code for pulling from database	Pair Programming
better code organization: organize code in folders i.e. components, tests etc.	Having too many stories with team member dependencies (if avoidable)	Starting our tasks before the last week
Testing the backend	waiting till the end to start testing	Working together on merges & rerouting
More & better refactoring	Spending too much time on a task.	Pair programming and fixing bugs.
Asking for help more often	Not asking for help, if needed	Testing the frontend
communicate better on integrating teammate's features with other's		having semi-fully comprehensive backend

5. **Planning Sprint #4 - User Stories**

In Sprint #3, we just about wrapped up total functionality. Like I said before, we are really going to focus on styling our website, ensuring consistency, and refactoring all our code. Each team member has a story for refactoring their code to remove bad smells. We are super happy with our software currently though, and can't wait to bring our initial idea from Figma to life!

Sprint 4 23 Nov – 7 Dec (15 issues)   42 0 0   **Start sprint** ...
